

Our combined accessibility services provide a unique set of solutions to solve digital compliance challenges for businesses in different industries, including education, healthcare, and e-commerce.

# ABOUT Zenyth Group

Zenyth is an end-to-end accessibility consulting firm who has the experience to help your company identify, remedy and support your accessible digital assets.

But, more than that, we're a group of individuals who have come together with the objective of being a trusted and reliable accessibility partner to help you navigate your journey to build digital assets that are accessible to people with disabilities.

## 01

Over the past seven years we've gained a reputation for exceeding the expectations of our clients.

## 02

The work we do consists of helping you protect your business from an ADA lawsuit but goes way beyond the law.

## 03

We're fueled by the belief that technology should be inclusive and accessible for people of all abilities.

## 04

When it comes to addressing ADA compliance on behalf of a business, consider our team your trusted partner who wants to be a part of your accessibility journey for years to come.

# OUR SERVICES

## Website & Mobile App Audits

Our team of accessibility experts evaluate the accessibility and compliance level of your website.

## Accessibility Support

This service provides full coverage, accessibility expertise and dedicated resources.

## Remediation Services

You can choose to either have our team fully manage code remediation or have us provide remediation oversight and consulting services.

## Captioning & Transcription

By combining artificial intelligence technology and human curation, Cielo24 is able to quickly produce highly accurate data for clients across all industries.

## Legal Compliance Consulting

If you've received a demand or complaint letter, please schedule a consultative call with us so we can help you determine the best course of action.

## Letter of Reasonable Accessibility

A letter of reasonable accessibility provides your business with protection against potential website lawsuits.

# WHOM WE WORK FOR

## ECommerce / Retail

As an online retailer, you may not be aware of how many potential customers leave your site due to accessibility challenges.

## Financial Services

The growing prevalence of managing our finances online also means financial institutions need their technology to meet accessibility compliance standards.

## Hospitality / Travel

We're here to support the efforts of businesses in the hospitality and travel industry to update and maintain the accessibility of their websites and mobile apps for their customers.

## Education

We work with educational institutions to update their systems to help them be accessible to students of all abilities.

## Healthcare

Patients with disabilities can review insurance claims, access health records, make appointments and so much more.

## Public Sector

We're proud to be an invaluable partner to organizations and vendors within the public sector. According to the World Health Organization, the number of people living with disability is increasing.

# OUR DATABASE

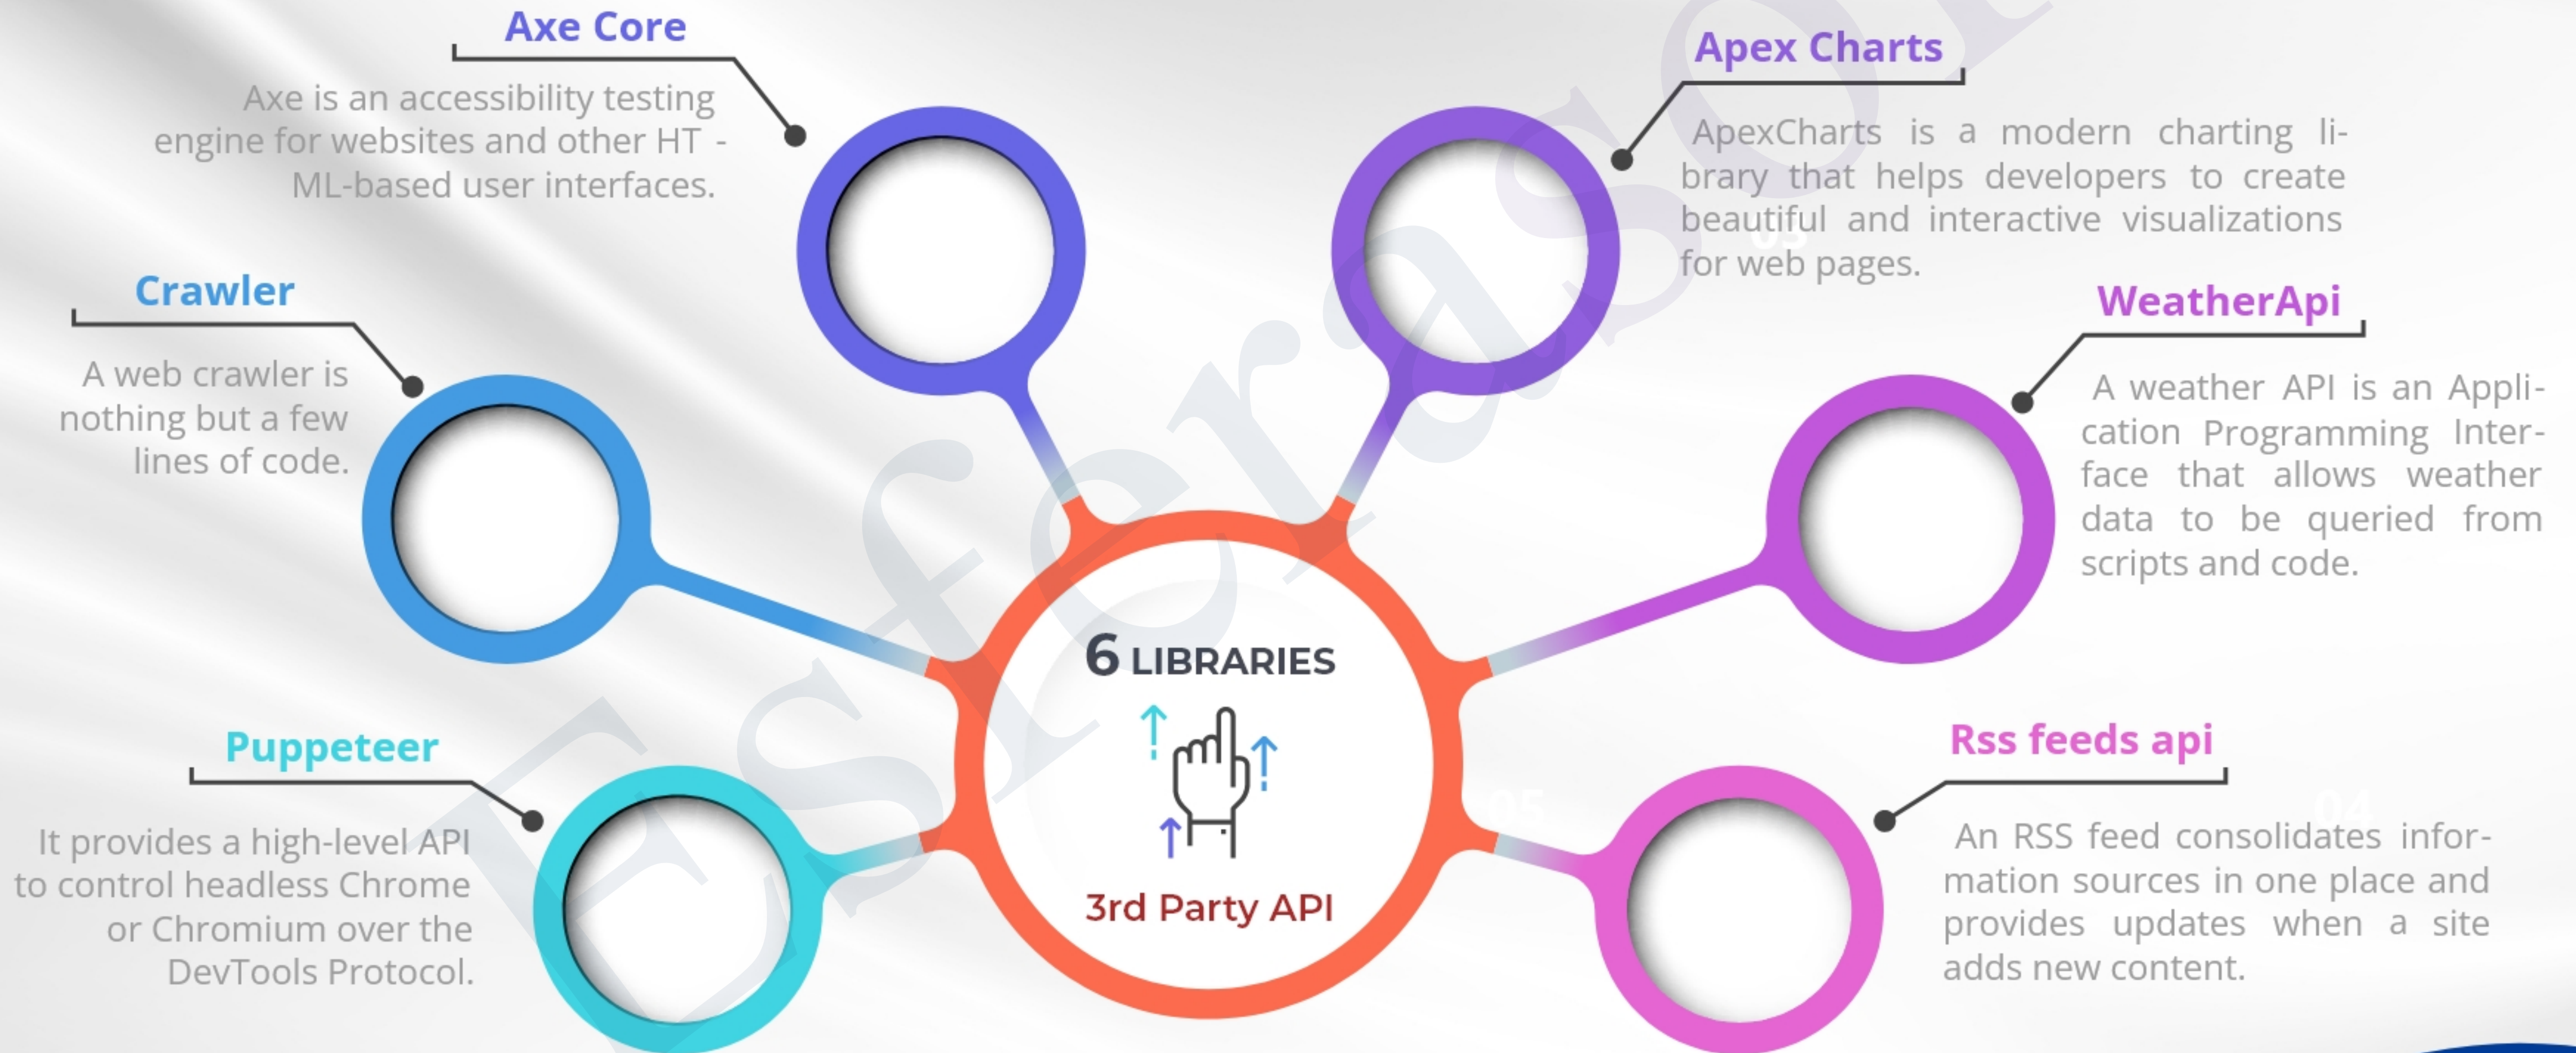

## MongoDB

MongoDB is a source-available cross-platform document-oriented database program. MongoDB uses JSON-like documents with optional schemas.

## MySQL

MySQL HeatWave is a fully managed service that enables customers to run OLTP, OLAP, and machine learning workloads directly from their MySQL Database.

# 3RD PARTY API

# OUR TECHNOLOGY

## ANGULAR JS

The resulting environment is extraordinarily expressive, readable, and quick to develop. It is fully extensible and works well with other libraries.

1

## ANGULAR SSR

This means that the application generally renders more quickly, giving users a chance to view the application layout before it becomes fully interactive.

2

## NODEJS

It's used for traditional web sites and back-end API services, but was designed with real-time, push-based architectures in mind.

3

## REACTJS

Design simple views for each state in your application, and React will efficiently update and render just the right components when your data changes.

4

## REACTNATIVE

React makes it painless to create interactive UIs. React will efficiently update and render just the right components when your data changes.

5

## HBS

It is a leading payment software company providing electronic payment solutions for financial institutions, processors, and national switches around the world.

6

# USE OF AWS AMPLIFY

AWS Amplify is a JavaScript library that allows you to create and deploy serverless applications in the cloud. It is a full-stack application platform with both client-side and server-side code.

## 1. Free to Start

AWS Amplify offers many free and impressive levels that offer several advantages and zero costs. You only need to establish a paid level if you reach a high threshold of technical requirements.

## 2. Development is Easy and UI driven

Using AWS Amplify for building mobile and internet appliances, offers a simple, fast and modern user interface approach.

## 3. Web-Based Analytics

AWS Amplify comes with a web-based analysis Dashboard for developers, designers, and project managers, which is extremely useful.

## 4. Usage-Based Payment

Like many other paid AWS Services, you only pay for the services you use, the AWS Amplify payment model is very flexible and cost-effective.

# USER FLOW - DASHBOARD

01

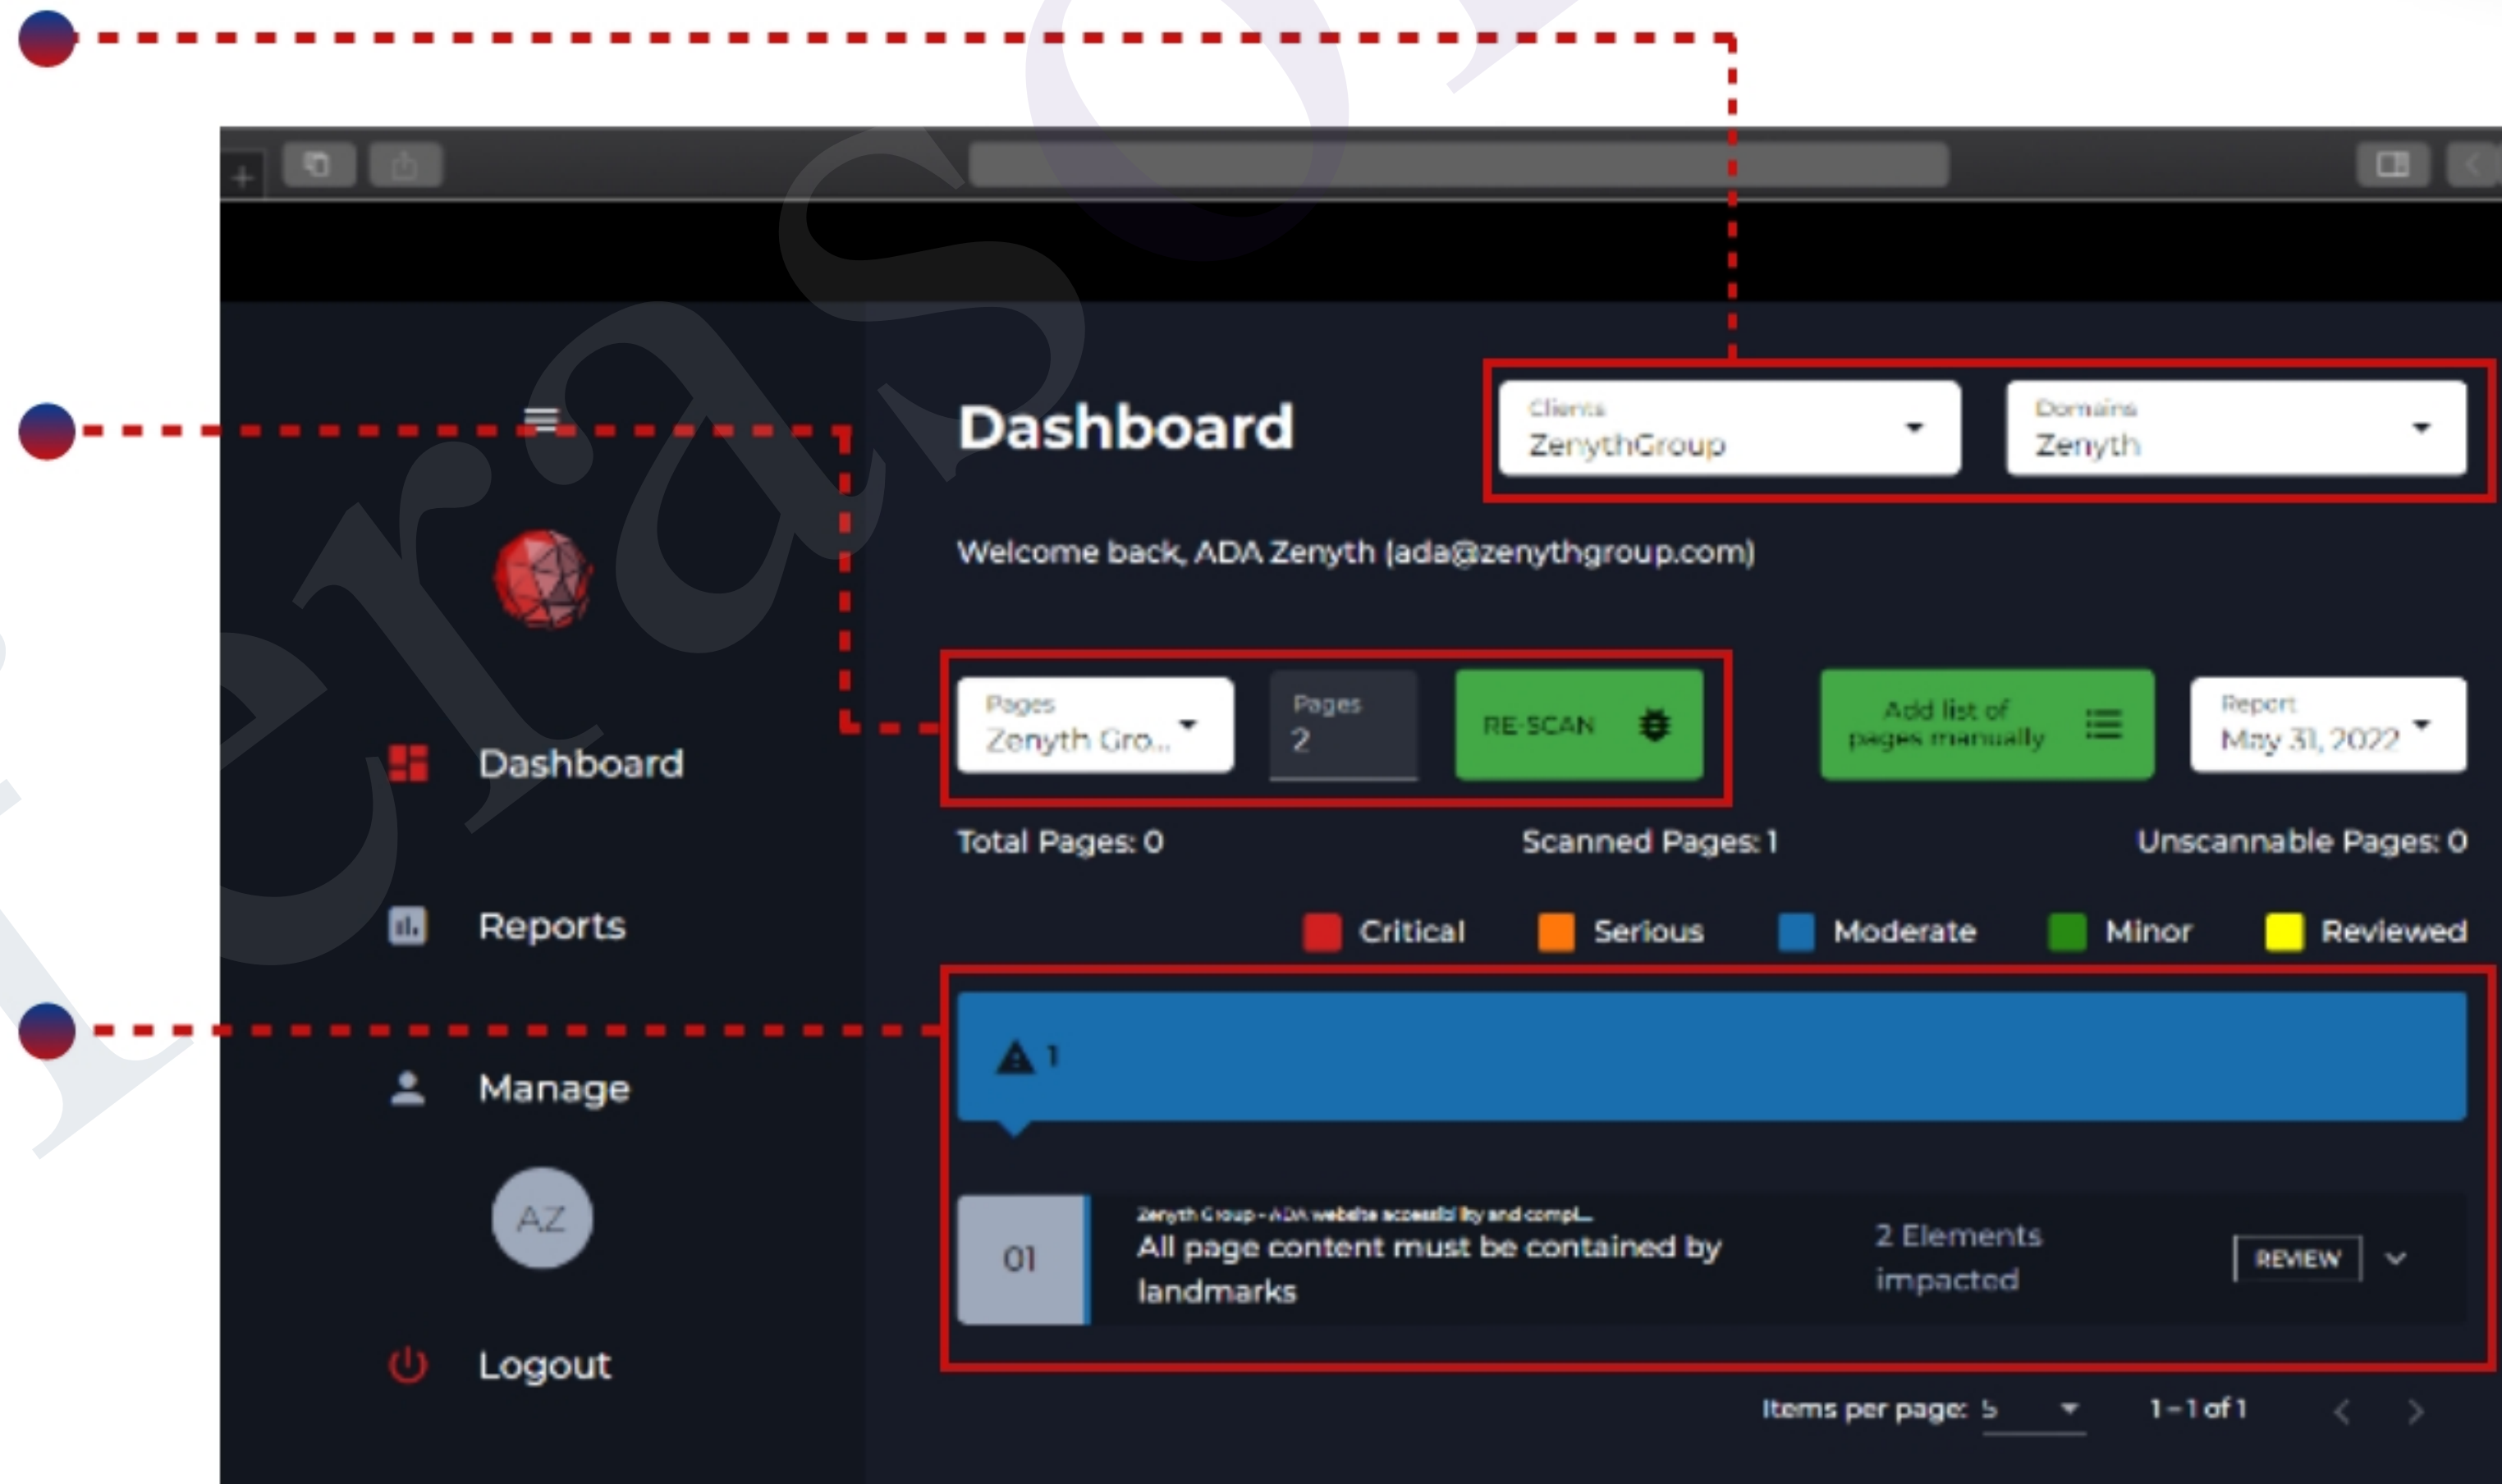

First select the date, client name and the domain.

02

Select the name of the company, number of pages you want to scan and click on Re-Scan button.

03

Ensures all page content is contained by landmarks otherwise error will be showed

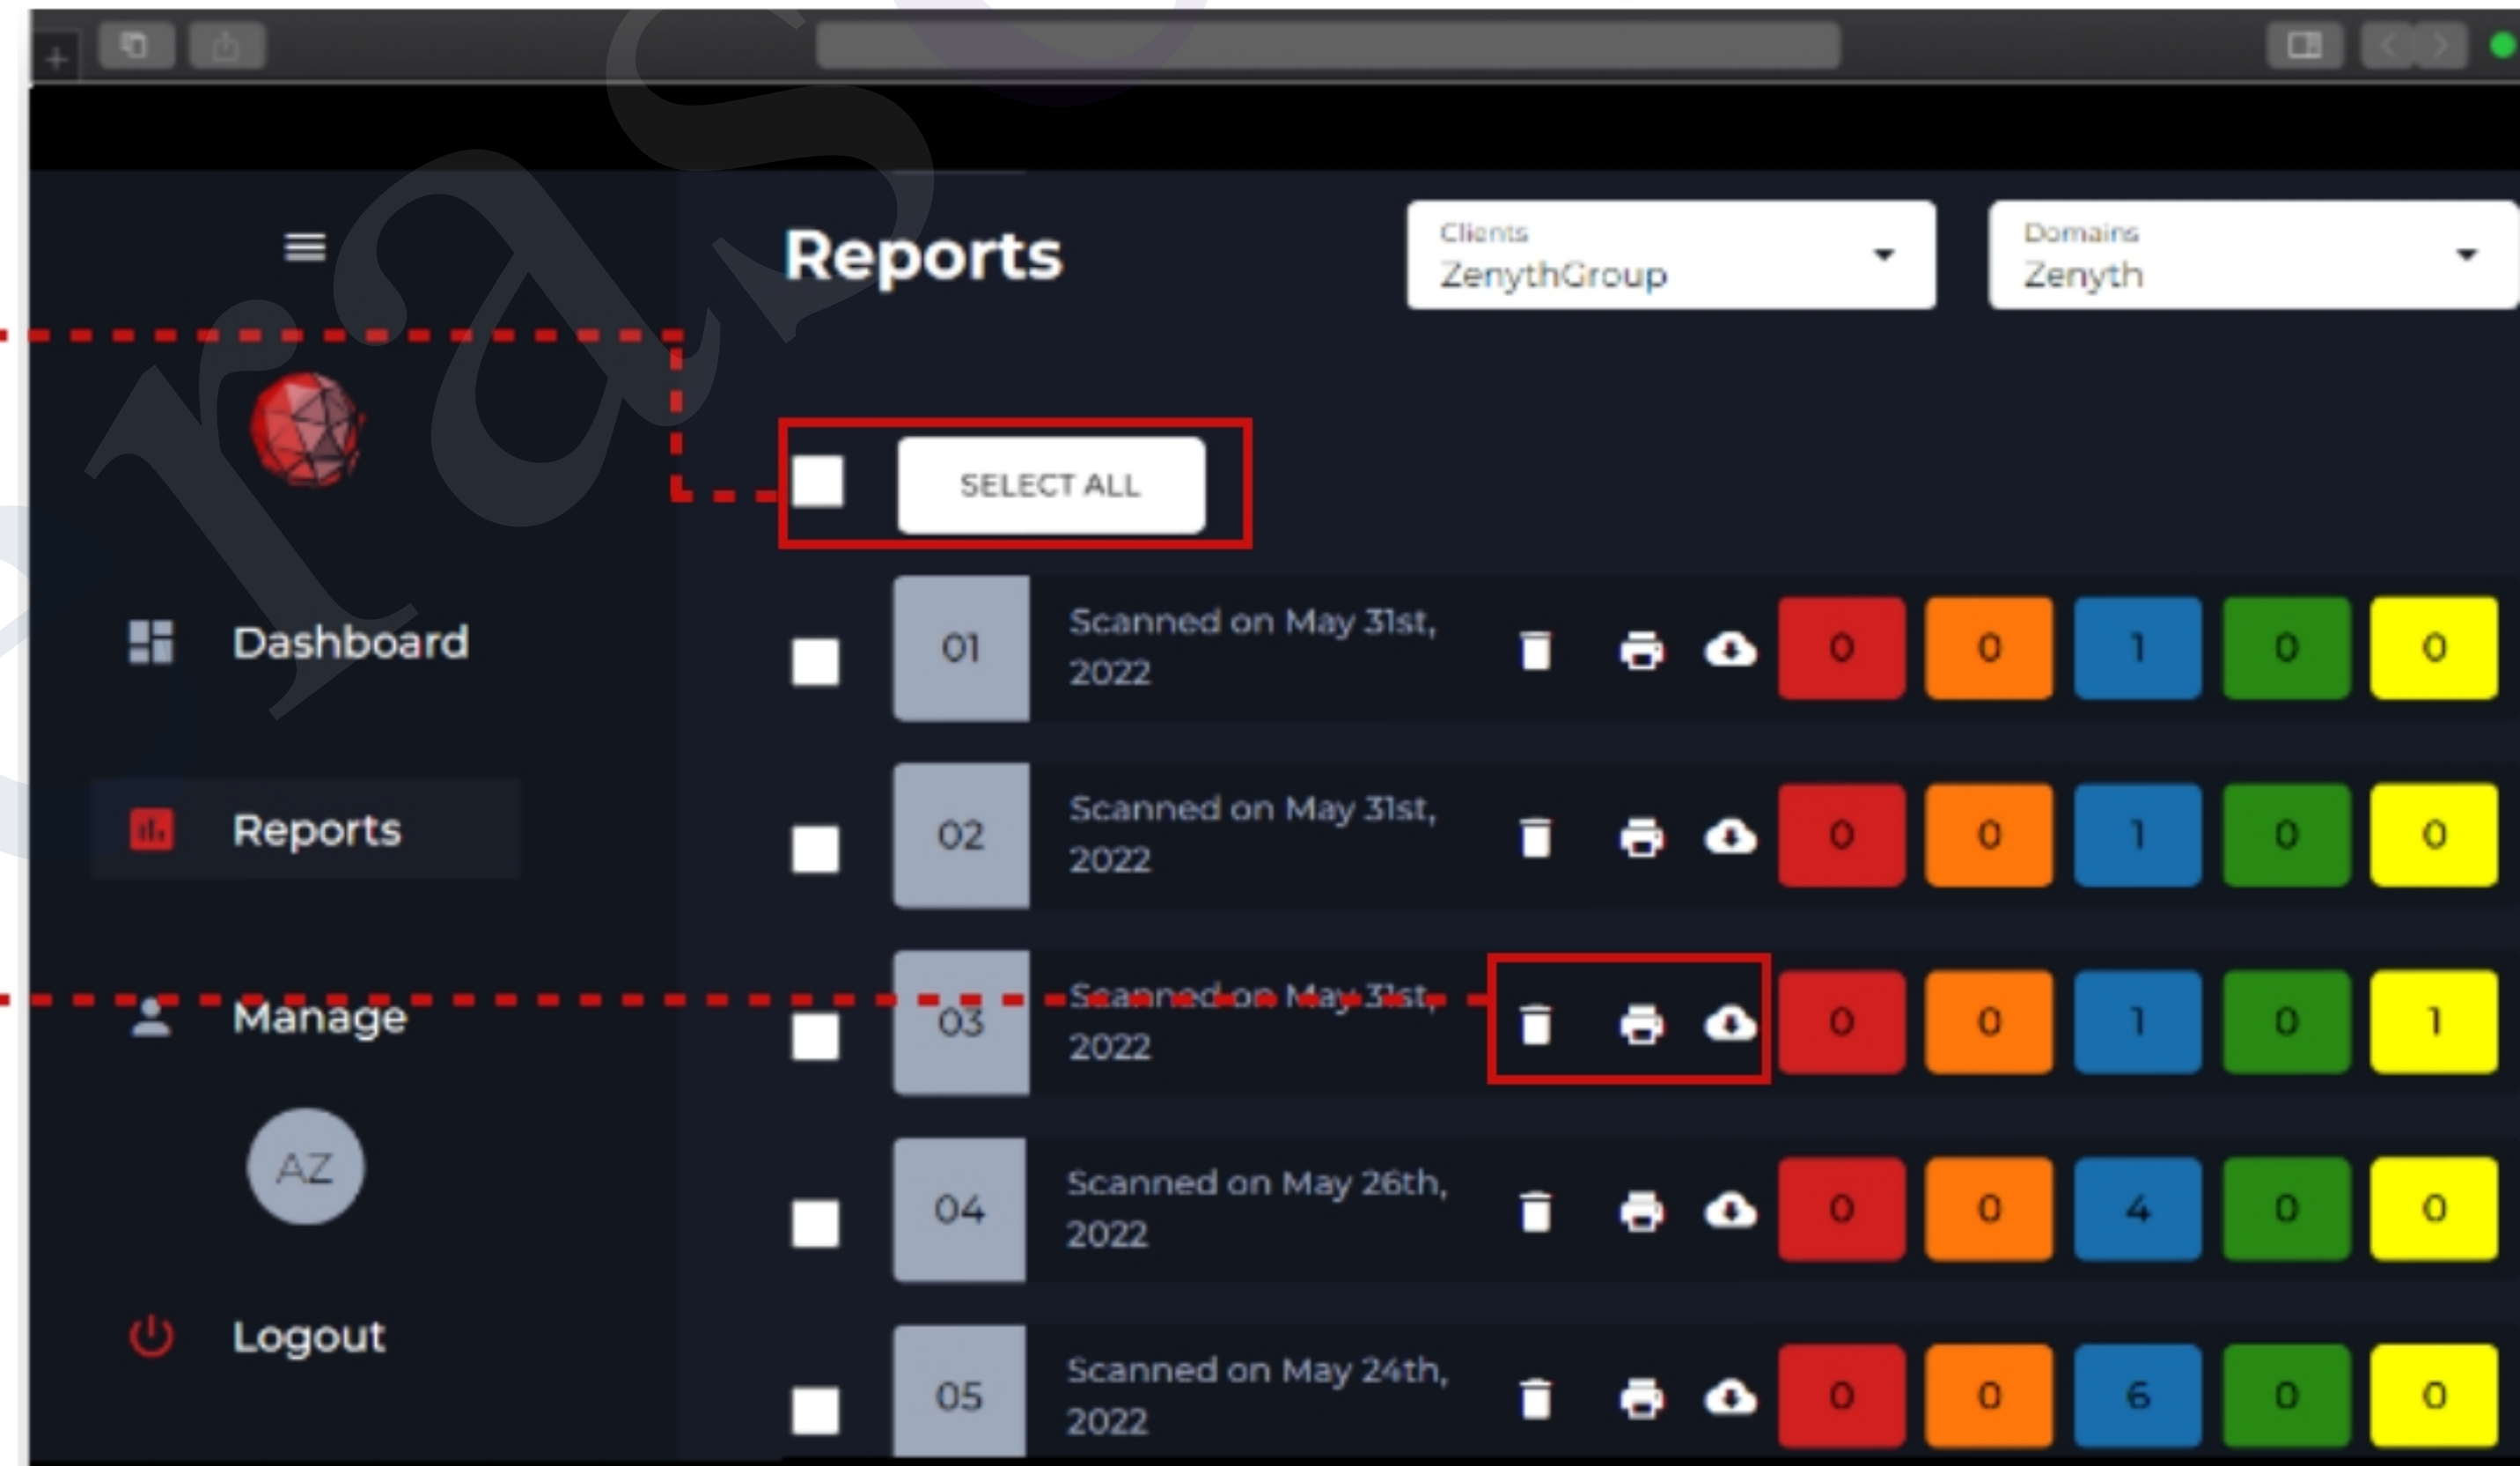

# USER FLOW - REPORT

01 This report shows all the errors issued while scanning the pages

02 You can select multiple reports and delete all together.

03 You can also save the error report in the cloud or print.

# USER FLOW - MANAGE

01 You can manage all the clients, domains, admin and the users by only selecting it.

02 Select the name of the client you want to edit from here.

03 Additional domains can also be added or edited from here.

The screenshot shows a dark-themed dashboard titled "Manage Domains". At the top right, there are four tabs: "Clients", "Domains" (which is active and highlighted), "Admins", and "Users". Below the tabs is a dropdown menu for "Clients" with "ZenythGroup" selected. The main content area contains a table with the following data:

#	Domain Name	Domain URL	Actions
01	Zenyth	https://zenythgroup.com	<span>🟢</span> <span>✎</span> <span>🗑️</span>
02	websiteally	https://websiteally.com/	<span>🟢</span> <span>✎</span> <span>🗑️</span>
03	Zenyth Blogs	https://zenythgroup.com/blog	<span>🟢</span> <span>✎</span> <span>🗑️</span>
04	allylabs	https://allylabs.com/	<span>🟢</span> <span>✎</span> <span>🗑️</span>

At the bottom right of the dashboard, there is a button labeled "Add Domain" with a green plus icon. The interface also includes a sidebar with navigation options: "Dashboard", "Reports", "Manage" (with a user icon and "AZ"), and "Logout".
